Vigilance Santé Honoured by the Public in the Community Pharmacy Category

At Première Ligne en Santé 2026, the award recognizes the contribution of Intervention Opportunities to the growth of clinical services in community pharmacy.

Repentigny, April 15, 2026 – Vigilance Santé is proud to announce that **Intervention Opportunities**, its add-on tool integrated into RxVigilance, received the **People’s Choice Award in the Community Pharmacy category** at the Première Ligne en Santé 2026 conference on April 9.

This distinction highlights the value of a solution designed to support the integration of clinical services into everyday community pharmacy practice. At a time when the clinical role of pharmacists continues to expand, Intervention Opportunities helps identify, prioritize, and manage interventions tailored to each patient’s profile. In doing so, the tool helps improve access to walk-in clinical services, strengthen continuity of care, and better target preventive actions.

For Vigilance Santé, this recognition is especially meaningful because it comes directly from professionals in the field and reflects the trust they place in its solutions.

“Receiving the People’s Choice Award in the Community Pharmacy category is a tremendous honour for our team and our company. This recognition confirms the value of our commitment to providing pharmacists with clinical tools that are reliable, practical, and grounded in the realities of everyday practice,” said Pascale Lapointe, pharmacist and Product Director for RxVigilance and RxPhotos.

The results of a pilot project also demonstrated the clinical relevance of Intervention Opportunities and the strong interest it has generated within the profession. This recognition further supports the continued rollout of the tool and confirms its potential to help advance clinical practice in community pharmacy across Canada.

About Vigilance Santé

Vigilance Santé’s mission is to facilitate excellence in medication therapy management. To this end, the company develops innovative and practical clinical tools that support healthcare professionals in delivering safe, evidence-based care. Renowned for its rigour, reliability, and continuous adaptation to the evolving needs of the industry, Vigilance Santé has earned a reputation as a trusted partner to healthcare professionals and organizations across Canada.

About Première Ligne en Santé (PLS)

Première Ligne en Santé is the annual gathering of leaders in frontline care and primary healthcare in Canada. Held each year in Montreal, the event brings together more than 1,500 participants from the political sphere, public administration, industry, clinical practice, research, innovation, and

the community sector. A strategic, bilingual, and immersive event, it showcases practical solutions to advance healthcare organization and innovation. To learn more about PLS:
