

## PRESS RELEASE

### RxConsultAction in Propel Rx: Vigilance Santé and McKesson Canada join forces to provide pharmacists with an integrated clinical services tool

*McKesson Canada Pharmacy Technology Solutions adopts Vigilance Santé's fully integrated solutions to provide its customers with tools tailored to their reality.*

**Repentigny, November 27, 2023** – As a result of a recent agreement, McKesson Canada's Propel Rx pharmacy software will now include direct access to RxConsultAction, a powerful tool helping pharmacists prescribe with confidence. Vigilance Santé and McKesson Canada are pleased to bring to users this fully Canadian solution, tailored to the realities of today's practice and integrated into the workflow. Pharmacists can therefore count on step-by-step assistance as they provide and document their clinical acts, including prescribing for minor ailments.

**Following are the main advantages for Propel Rx users:**

- No additional login required to access RxConsultAction
- Link to patient file: no double data entry
- Decision support provided through a dynamic form
- Assistance in complying with the regulatory framework
- Automatic generation of documents
- Flat fee per pharmacy, with unlimited number of users

*"Pharmacists working with Propel Rx will soon enjoy all the benefits, within their pharmacy management system, of a tool supporting them as they provide clinical services," says Andrée-Anne Chevalier, President of Vigilance Santé. "I'm thrilled to be working with McKesson Canada and its Pharmacy Technology Solutions division to facilitate pharmacists' daily activities. This agreement also reflects Vigilance Santé's growing role as a provider of clinical solutions in Canada. This is great news!"*

*"We're delighted to partner with Vigilance Santé, bringing minor ailments prescribing to our clients. Seamless integration between Propel Rx and RxConsultAction guides pharmacists through the clinical documentation process, helping them focus on what matters - spending time with patients", says Carla Colombi, Director of Customer Success at Pharmacy Technology Solutions. "Integrating with RxConsultAction is a stepping-stone to the many services Vigilance Santé has to offer. Stay tuned for additional benefits of this partnership in the months to come. We are very excited and are confident our clients will be too."*

## About Vigilance Santé

Established in 1991, Vigilance Santé combines knowledge, intelligence, and technology to empower frontline health care professionals. To this end, the company develops IT solutions and databases with the aim of ensuring the safe and optimal use of medications.

RxVigilance, its flagship product, already has more than 50,000 users. With monthly updates, the software can be used to look up drug information, perform comprehensive pharmacological profile analyses, access a broad range of patient handouts, and much more. Vigilance Santé's other products include RxPhotos, which hosts a database of over 50,000 photos of pills and their packaging across three services. The company's latest product, RxConsultAction, offers step-by-step assistance to pharmacists, within their pharmacy software, in the provision and documentation of clinical services.

## About McKesson Canada Pharmacy Technology Solutions

Pharmacy Technology Solutions (PTS) is McKesson Canada's retail pharmacy technology division, serving both Independent and Rexall pharmacies across Canada. For over 45 years, PTS has partnered with pharmacy owners to deliver powerful solutions that are the heart of pharmacy operations. It's this partnership that allows the company to explore and develop new and innovative solutions, embracing technologies that offer added value to retail pharmacies.

As an end-to-end technology partner, PTS offers a completely integrated suite of best-in-class products. Flagship products Propel Rx and Propel POS are designed to dramatically streamline retail pharmacy operations, allowing pharmacy owners to smoothly run their business and focus on providing excellent patient care.
