

## PRESS RELEASE

### RxConsultAction: Now Available Across Canada

*Pharmacists in every Canadian province can now rely on RxConsultAction to support them in providing and documenting minor ailment consultations and other clinical services.*

**Repentigny, December 9, 2025** – Vigilance Santé is pleased to announce that RxConsultAction is now available to pharmacists in every Canadian province. This coast-to-coast availability strengthens Vigilance Santé’s commitment to provide decision-support tools that enable safe, guideline-aligned care for Canadians.

*“The rollout of RxConsultAction across all ten Canadian provinces marks a pivotal moment for clinical pharmacy services. We are proud to offer pharmacists a tool that makes their practice more efficient, more structured, and better documented, and we will keep evolving it to support pharmacy teams in the care they provide,”* Julien St-Denis, Product Director - Clinical Services, and pharmacist.

Already in use in more than 2,800 pharmacies, RxConsultAction guides pharmacists step by step as they deliver clinical services and document their interventions directly within their pharmacy software.

The Clinical Services team will continue to closely monitor the evolving scope of pharmacy practice across Canada, whether with regard to new minor ailments, expanded vaccination programs, or the rise of point-of-care testing, so that RxConsultAction remains accurate, up to date, and aligned with the regulatory and clinical standards specific to each province.

#### About Vigilance Santé

Vigilance Santé’s mission is to facilitate excellence in medication therapy management. To this end, the company develops innovative and practical clinical tools that support healthcare professionals in delivering safe, evidence-based care. Renowned for its rigour, reliability, and continuous adaptation to the evolving needs of the industry, Vigilance Santé has earned a reputation as a trusted partner to healthcare professionals and organizations across Canada.
